

Providing Advanced Cybersecurity Solutions

We provide advanced cybersecurity & technology solutions that succeed in today's constantly changing threat landscape.

Who We Are

The Immortal Cyber Inc. team is an advanced cybersecurity research and technology firm. Our team's capability is built on decades of experience delivering advanced solutions and research to commercial and government clients.

Past Performance

Immortal Cyber Inc. is a small business trusted by the federal government and Fortune 100 companies, showcasing our ability to deliver high-quality cybersecurity solutions across various sectors. Our work spans national security, finance, healthcare, and emerging technologies.

Why Choose Us

Global Network, Local Impact

Our global connections with vulnerability researchers and capability developers allow us to stay ahead of cybersecurity trends and threats. This is accomplished through data intelligence and capability acquisition.

Multidisciplinary Approach

Our team's expertise covers a range of niches, including internet of things (IOT), drones, vehicle infotainment systems, all popular desktop operating systems and more.

Customized Solutions

Unlike one-size-fits-all, we tailor our solutions to meet each agency's specific needs and regulatory requirements, ensuring optimal protection and compliance.

Core Competencies

Advanced Cyber Research

- Vulnerability Research
- Capability Development
- Embedded Device Reverse Engineering (RE)

Defensive Cybersecurity

- Threat Simulations
- Cyber Intrusion Analysis
- Red Team Testing
- Command and Control (C2)

Enterprise Technology

- Digital Transformation
- Cloud Architecture
- Disaster Recovery
- Integration Services

Cyber Ranges

- Master Range Design
- IOT and Mobile Emulation
- AI-Enabled Open Architecture
- Operations & Management

Management Consulting

- Governance, Risk, Compliance (GRC)
- Training (Board Level - Operator)
- Program Management
- Virtual CISO
